WORK EXPERIENCE

July 1, 2020 - Present

Freelance Developer
- Developed [specific type of projects, e.g., websites, desktop apps, or mobile apps] for personal and academic purposes.
- Collaborated with clients to design, implement, and deliver software solutions.
- Applied skills in Java, JavaFX, React, Spring Boot to create functional and user-friendly websites and applications.
- Continuously self-learned new tools and frameworks to enhance development expertise.

VOLUNTEER EXPERIENCE

December 1, 2024
Strategy First Panchan Tower,
Sanchaung

GOOGLE DEVFEST 2025

- Provided technical assistance to speakers, including conducting microphone checks and ensuring seamless laptop-to-projector connections.
- Facilitated the distribution of event materials, such as t-shirts and participation cards, to attendees.
- Supported overall event coordination by handling additional tasks as required to maintain an efficient and professional environment.

This opportunity allowed me to strengthen my organizational, technical, and interpersonal skills while contributing to the success of a large-scale event.

December 14,2024
American Center Yangon (ACY)

Zero 2 Maker Program by Share It Forward Organization

- Assisted children in creating 3D designs based on their online course assignments, fostering their understanding of 3D modeling and printing.
- Operated 3D printers to produce students' designs, ensuring accuracy and quality.
- Provided additional support to students, addressing their queries and ensuring they had the resources to complete their tasks successfully.

This experience enhanced my technical proficiency, mentoring skills, and ability to support educational programs.
